Summary

I am a Full Stack Web Developer with over one year of experience, specializing in building robust web applications using Laravel and Livewire for backend development, and jQuery and Ajax for frontend design. My expertise spans various web technologies, including PHP, HTML, CSS, JavaScript, and Bootstrap for creating user-friendly interfaces.

Additionally, I am a skilled Grails Developer, adept at developing and maintaining applications using the Grails framework to meet diverse client requirements. I have a solid background in database management, web application security, and network development, supported by a CCNA certification.

I am proficient in Linux systems, bash scripting, and version control using Git, ensuring efficient project development and deployment. With strong problem-solving skills and analytical abilities, I am dedicated to delivering effective solutions that meet project goals, whether working independently or as part of a collaborative team.

I also have 3 years of experience in the telecommunications industry, working with companies such as **Orange JO** with **UBS** which enhanced my knowledge of networking, large-scale systems, and enterprise-level application demands.

Education

2019-2021: **programming and network manager**
FROM PTUK University

2019-2021: **CCNA Networking Certification**
FROM PTUK University

2021-Feb : **shameel exam**
FROM PTUK University

2023-Aug: **Time management - project management**
Branding - communication skills
FROM HASSIB SABBAGH CENTER & AAUP

Work Experience

- 2023-Sep: **UBS - unique beanies solution**
Ramallah - Al-masyoun
Full Stack Developer
- 2023-Sep: **Upword**
Online Freelancers Website
Full Stack Developer (Freelancer)

Personal Projects

• Skin Analysis Backend System

A backend API system built with Laravel 10 to power a mobile skin analysis application. The project focuses on analyzing user-submitted facial images using AI (OpenAI GPT integration) and providing personalized skin insights. It includes secure user authentication, support for social login (Google/Facebook), multilingual response handling, and a structured architecture using service layers and controllers. Designed for seamless integration with a Flutter-based frontend running on Android POS devices in Kiosk mode.

Technologies Used:

- **Backend:** Laravel 10
- **Authentication:** Laravel Passport, Socialite (Google, Facebook login)
- **AI:** ChatGpt API
- **API Communication:** RESTful API, multilingual responses
- **Database:** MySQL
- **Infrastructure:** Linux (Ubuntu)

• U-Study Academy Sep - 2024

USTUDY Academy is a leading educational institution providing a wide range of specialized educational services. The platform was developed to serve as an ideal destination for students seeking exceptional learning opportunities in a stimulating environment. The academy's vision is to become a pioneer in education and training while contributing to the development of a generation of experts capable of competing in the global job market. Its mission focuses on offering innovative, high-quality educational programs tailored to meet diverse student needs and help them achieve their academic and professional goals.

Technologies Used:

- **Backend:** Laravel
- **Frontend:** jQuery, Ajax, Bootstrap, CSS, JavaScript
- **Database:** MySQL
- **Hosting:** linux server ubuntu

- **Chalets Websites** Aug - 2024

Developed a premium chalet booking platform offering a seamless user experience, combining modern design and functionality. The platform features a user-friendly interface, secure booking system, and customized services, delivering a luxurious and tranquil stay for guests seeking comfort and privacy in exclusive chalets.

Technologies Used:

- **Frontend:** jQuery, Ajax, Bootstrap, CSS, JavaScript
- **Backend:** Laravel
- **Database:** MySQL
- **Hosting:** linux server ubuntu

- **UFQ-STUDY** Jan - 2021

I developed a user-friendly website for downloading university books, built with PHP, MySQL, Bootstrap, and JavaScript. The platform allows students to easily search, upload, and download academic books across various subjects. It includes a secure login system for users and a powerful admin panel for managing accounts, content moderation, and overall site functionality. The use of Bootstrap ensures a responsive and visually appealing interface for an optimal user experience.

Technologies Used:

- **Frontend:** Bootstrap, CSS, JavaScript
- **Backend:** PHP
- **Database:** MySQL
- **Hosting:** linux server ubuntu

- **Telegram AI bot** Jan - 2022

Developed an AI-powered Telegram bot that delivers intelligent, real-time responses using OpenAI's API. The bot features seamless Telegram integration, natural language understanding, and a PHP backend that manages API communication, user interactions, and authentication, offering users a smart and efficient conversational experience.

Technologies Used:

- **Backend:** Laravel
- **Frontend:** Telegram App
- **AI :** chatGpt AI API
- **Database:** MySQL
- **Hosting:** linux server ubuntu

Competencies

Full Stack Development:

- Proficient in **Laravel**, **Livewire**, **Tailwind**, **Bootstrap**, **Ajax**, **jQuery**, and **React** for building dynamic, responsive, and efficient web applications.

Web Backend Development:

- Extensive experience with **PHP**, **Groovy** delivering robust server-side solutions with a focus on performance and scalability.

Web Front-End Design:

- Expertise in **Bootstrap**, **Tailwind**, **CSS**, and **React** for creating visually appealing, mobile-first, and user-friendly web interfaces.

Programming Languages:

- Proficient in **PHP**, **C++**, **Python**, and **Bash scripting**, enabling versatility in both front-end and back-end development.

Database Management:

- Solid experience with **ORACLE**, **MySQL**, with a deep understanding of designing, optimizing, and managing relational databases.

Server Management & Administration:

- Hands-on experience with **Red Hat**, **Ubuntu Server**, and **Windows Server**, including server configuration, deployment, and maintenance.

Networking:

- Strong understanding of networking concepts with **CCNA** certification, proficient in setting up and managing networks.

Operating Systems:

- Advanced knowledge of **Linux**, **Mac**, and **Windows** operating systems, capable of navigating and troubleshooting across platforms.

Object Oriented Programming (OOP):

- Deep understanding of **OOP principles**, enabling clean, scalable, and maintainable code.

Version Control:

- Proficient in using **Git** for version control, ensuring efficient collaboration and code management.

Development Tools

Tools :

- Skilled in using tools like **Linux Servers**, **Postman**, **Apache**, **Tomcat**, **XAMPP**, **VMware**, and **Microsoft IIS** to streamline development and testing processes.

Security & Ethical Hacking:

- Knowledgeable in **Ethical Hacking** and **Web Security** best practices, ensuring secure applications and data protection.

SEO & Digital Marketing:

- Understanding of **SEO** techniques and best practices, optimizing web applications for search engine visibility and performance.

soft skills: effectively work and contribute within cross-functional teams., accurate, motivated, reliable, fast and friendly.

Personal Interests

- **Web Backend Development:** I am deeply passionate about web backend development, harnessing my skills to craft highly efficient and resilient web applications. Through my expertise, I strive to deliver exceptional user experiences and optimize the performance of web platforms.
- **Problem Solving:** I thrive on the excitement of solving intricate problems and possess a natural ability to think analytically and logically. I approach challenges with a proactive mindset, leveraging innovative strategies to overcome obstacles and achieve optimal outcomes.
- **Continuous Learning:** I have a strong drive for continuous learning and actively seek opportunities to broaden my knowledge in web technologies and advanced problem-solving techniques. By staying abreast of the latest advancements in the field, I ensure that I am equipped with cutting-edge tools and methodologies to drive success in my projects.
